## SUMMARY

Versatile Software Developer specializing in Frontend Development with strong proficiency in JavaScript and React.js for building responsive, user-centered web interfaces. Skilled in modern UI/UX design principles and converting clean, intuitive designs into seamless digital experiences. Equipped with foundational backend knowledge using Node.js and MongoDB, enabling end-to-end development capabilities. Experienced in Git version control and collaborative agile workflows. Committed to writing maintainable code, optimizing performance, and delivering scalable, high-quality solutions.

## EXPERIENCE

### Software Developer

#### ANORG Technologies Private Limited

I have worked as a Developer with a strong focus on Frontend Development, gaining hands-on experience across diverse technologies. I have collaborated effectively with cross-functional teams to deliver high-quality software solutions, demonstrating strong problem-solving abilities, adaptability, and a commitment to continuous learning. I have also mentored new team members and coordinated with stakeholders, contributing to smoother workflows, improved team productivity, and successful project outcomes through proactive communication and leadership.

## EDUCATION

### Bachelor of Technology in Computer Science

#### Sardar Patel University

08/2020 - 05/2024 Balaghat

#### XII

#### Ideal Public School

01/2018 - 06/2019 Waraseoni

#### X

#### Ideal Public School

01/2016 - 06/2017 Waraseoni

## SKILLS

|       |        |                    |          |                 |       |       |
|-------|--------|--------------------|----------|-----------------|-------|-------|
| C     | GitHub | C++                | Python   | JavaScript      | React | Agile |
| Linux | Node   | Expressjs          | Mongodb  | Data Structures |       |       |
| HTML5 | CSS3   | Visual Studio Code | Tailwind |                 |       |       |

## PROJECTS

### Anxiety Score Test (ReactJS, Redux, Node.js, MongoDB)

Developed a psychological test platform using ReactJS with a 'Yes/No' scoring system. Integrated gender-based logic and result interpretation. Implemented backend APIs using Node.js and MongoDB for score storage and analysis.

### NoBroker-style Services Provider App (MERN Stack)

Built a service booking system with admin panel functionality for provider verification, analytics dashboard, and dynamic service listing. Implemented secure authentication and responsive design using Tailwind CSS.

### Pathology Report Integration System (MERN Stack)

Integrated pathology reports into an existing booking system using ReactJS, Node.js, and Express. Enabled users to upload, view, and download lab reports efficiently with user-friendly UI.

## CERTIFICATION

### Python Training

Python training course at RT Soft Solutions

### Frontend Bootcamp

Frontend development course on Udemy

### MYSQL Bootcamp

MySQL database management course on Udemy

### Linux Training

Linux administration training course

## RESPONSIBILITY

### Event Management

Event management and leadership skills developed through organizing and managing college events

### Project Coordination

Skills in project planning, team coordination, and project execution gained from leading a college project
